

DOUBLE ROW FULL COMPLEMENT CYLINDRICAL ROLLER BEARINGS

Double Row Full Complement Cylindrical Roller Bearings in the NNF design are sealed locating bearings. The rigidity of these bearings allow for support of very high radial forces as well as light to moderate axial forces in both directions. The increased capacity is achieved from a full complement roller set. These bearings are supplied pregreased and can be relubricated from either the outer or inner rings. The outer rings are also grooved to accommodate WRE retaining rings which can be purchased separately.

Double Row Full Complement Cylindrical Roller Bearings are most suited to high load, relative low speed applications such as bar straighteners, rolling mills, machine tools, rope sheaves and gearbox output shafts.

SERVICES

SAME OR NEXT-DAY SHIPPING

98% order fill rate. All orders are shipped the same or next day. We can service most of our customers in 1-2 days via standard shipping.

WILL CALL

Nine strategically located warehouses across the country. Orders can be made available for will call and customer pickups.

AFTER HOURS SERVICES

Available 24/7 to handle all of your emergency requirements. For immediate assistance, please call your local toll free number.

CUSTOMER SERVICE

Available by phone, fax, email or online and answered directly by an experienced and qualified customer service representative.

LOCATIONS

Need a bearing immediately? We offer after-hours emergency services at all of our nine locations. For after-hours support, please call your district's toll-free number and follow the prompts.
