

# CONTROL BEARINGS

Consolidated Bearings offers a full line of Control Bearings. Control Bearings are available in **light, medium** and **heavy-duty** types. Control Bearings, with their precision manufacture and durable design, are used in a variety of applications that require a high load capacity and slow rotation. Being compact, corrosion resistant, Teflon sealed, and pre-lubricated with grease, these bearings can be used in what could be considered harsh environments. Normal operating temperatures for Control Bearings range from -65°F to +250°F.

## PRODUCT APPLICATION

Consolidated's line of Control Bearings are not cadmium plated and are intended for industrial applications only such as medical devices, robotics, air frame control and materials handling systems.

## HIGHLIGHTS

*Compact  
Corrosion resistant  
Teflon sealed  
Pre-lubricated with grease*
